

RUNETERRA LORE ARCHIVE

A Controlled Knowledge Corpus for RAG Evaluation

50 champions • 13 regions • cross-page relationships • timelines • uncertainty • distractors

Prepared as a synthetic, canon-inspired educational benchmark. Not an official Riot Games publication. Lore can change over time; this corpus intentionally freezes a consistent internal version for repeatable evaluation.

How to Use This Corpus

This document is designed to behave like a real organizational knowledge base rather than a collection of isolated biographies. Important facts are repeated from different perspectives, distributed across multiple sections, and sometimes qualified by uncertainty.

For ingestion experiments, preserve page metadata and heading structure. Recommended chunk sizes are 500-900 tokens with 10-20 percent overlap. Evaluate retrieval separately from generation so that a correct answer can be traced to the passages actually returned.

Do not ingest the companion CSV answer key into the same vector store. The answer key includes question type, expected answer, and expected evidence location.

The corpus includes deliberately unanswerable questions. A strong system should state that the information is not present rather than inventing an answer.

Corpus Map

Section	Purpose	Retrieval challenge
Regional dossiers	Culture, institutions, conflicts	Broad context and metadata filtering
Historical incidents	Events spanning multiple factions	Multi-hop and timeline reasoning
Champion files	Biographies and relationships	Entity retrieval and coreference
Relationship index	Compact cross-reference	Distractor handling and graph reasoning
Uncertainty notes	Claims with incomplete evidence	Calibrated answers

Magic and Petricite

Magic in Runeterra appears through inherited talent, spiritual practice, celestial influence, elemental study, artifacts, and environmental corruption. Demacia's petricite absorbs magical energy, which helped create a culture that sees suppression as protection. The same material can store and later release power, making it symbolically and practically ambiguous.

Cross-reference: see regional dossiers and champion files for competing interpretations and consequences.

Hextech and Chemtech

Piltover develops hextech as a prestigious bridge between magic and engineering. Zaunite chemtech often advances under fewer safeguards and harsher conditions. The division is not simply good technology versus bad technology: access to funding, political legitimacy, labor, and environmental risk shapes which inventions are celebrated.

Cross-reference: see regional dossiers and champion files for competing interpretations and consequences.

The Spirit Realm

Ionia's spiritual balance means that political violence can have metaphysical consequences. Shen protects balance, Zed prioritizes force, and Yone's return demonstrates that death does not close every conflict. Spiritual descriptions may be literal within this corpus rather than metaphorical.

Cross-reference: see regional dossiers and champion files for competing interpretations and consequences.

Celestials and Aspects

Targon connects mortals to celestial power. Leona and Diana become hosts for opposing celestial traditions, while Atreus survives the loss of the Aspect of War and reclaims mortal agency. Aurelion Sol reveals that celestial systems can also enslave beings more powerful than their supposed servants.

Cross-reference: see regional dossiers and champion files for competing interpretations and consequences.

The Void

The Void is treated as an invasive force that consumes, adapts, and distorts. Kai'Sa survives through symbiosis, Kassadin fights through forbidden tools, Malzahar welcomes surrender, and Lissandra contains an ancient Void-linked threat beneath the Freljord.

Cross-reference: see regional dossiers and champion files for competing interpretations and consequences.

The Black Mist

The Black Mist originates in the Ruination and carries spectral corruption beyond the Shadow Isles. Different characters experience it as prison, weapon, memory, or existential threat. Senna's relationship to the Mist differs from Thresh's even though both draw power from it.

Cross-reference: see regional dossiers and champion files for competing interpretations and consequences.

Regional Dossier: Demacia

A hereditary kingdom built around order, duty, and military service. Demacia presents itself as a refuge from dangerous magic, yet its institutions have repeatedly treated mages as threats. Petricite architecture absorbs magical energy, making the capital both symbol and instrument of the kingdom's fear of uncontrolled power.

Institutions and pressures

The crown, noble houses, military orders, and Mageseekers do not always share the same priorities. Public unity can conceal private disagreement. The mage crisis exposes this fragmentation.

Champions indexed to this dossier

Garen, Lux, Sylas, Jarvan IV

RAG note

Questions about Demacia may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Regional Dossier: Noxus

An expansionist empire that claims anyone can rise through strength, vision, and guile. Its openness to talent coexists with conquest, political manipulation, and brutal military campaigns. Noxian power is divided among competing institutions, including the Trifarix and the secretive Black Rose.

Institutions and pressures

The Trifarix distributes authority among principles of vision, might, and guile, but secret networks challenge any transparent account of who holds power.

Champions indexed to this dossier

Swain, Darius, Katarina, LeBlanc

RAG note

Questions about Noxus may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Regional Dossier: Ionia

A spiritually saturated archipelago where the physical and spirit realms exist in delicate balance. Noxus's invasion shattered that balance and divided Ionians between preservation, resistance, and militarization. Many personal rivalries in Ionia began as disagreements over how to respond to foreign occupation.

Institutions and pressures

Local orders, villages, spiritual traditions, and resistance movements overlap without forming a single state. The invasion accelerated political identities that had previously been less important.

Champions indexed to this dossier

Irelia, Yasuo, Yone, Shen, Zed, Akali, Jhin

RAG note

Questions about Ionia may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Regional Dossier: Piltover

A wealthy city of invention, trade, and academic prestige. Piltover's progress depends on hextech, commerce, and its geographic control of routes above Zaun. Its public image of refinement often hides dependence on labor and resources from the undercity.

Institutions and pressures

Councils, academies, merchant families, and inventors convert technical prestige into political power. Dependence on Zaun is often obscured by geography and class.

Champions indexed to this dossier

Caitlyn, Jayce, Heimerdinger

RAG note

Questions about Piltover may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Regional Dossier: Zaun

The industrial undercity beneath Piltover, shaped by chemical innovation, hazardous labor, and political neglect. Zaun produces brilliant inventors and dangerous technologies, but its communities pay the health and environmental costs of unchecked experimentation.

Institutions and pressures

Authority is fragmented among communities, industrial leaders, criminal powers, and inventors. Survival networks frequently substitute for public institutions.

Champions indexed to this dossier

Vi, Jinx, Ekko, Viktor

RAG note

Questions about Zaun may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Regional Dossier: Freljord

A frozen northern land divided among tribes with competing visions of survival. Ashe seeks unity through alliance, Sejuani through strength, and Lissandra through secrecy and control. Ancient threats beneath the ice make current tribal wars part of a much older conflict.

Institutions and pressures

Tribal affiliation, ancient bloodlines, survival resources, and myth all shape legitimacy. No one leader controls the entire region.

Champions indexed to this dossier

Ashe, Sejuani, Lissandra, Tryndamere, Braum

RAG note

Questions about Freljord may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Regional Dossier: Shurima

Once the center of a vast empire empowered by the Sun Disc and its Ascended warriors. The empire collapsed during Azir's failed Ascension, when Xerath seized power and devastated the capital. Shurima's restoration reopens ancient loyalties, betrayals, and ambitions.

Institutions and pressures

The restored emperor claims continuity with an ancient state, while modern communities have lived for generations without imperial rule.

Champions indexed to this dossier

Azir, Xerath, Nasus, Renekton, Taliyah

RAG note

Questions about Shurima may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Regional Dossier: Targon

A mountain and celestial nexus where mortals climb toward transformation. The Solari and Lunari interpret celestial power through rival traditions, while Aspects use human hosts to influence Runeterra. Targon's conflicts are simultaneously religious, political, and cosmic.

Institutions and pressures

Religious institutions interpret celestial events for political purposes. Suppressed history fuels the Solari-Lunari conflict.

Champions indexed to this dossier

Leona, Diana, Pantheon, Aurelion Sol

RAG note

Questions about Targon may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Regional Dossier: Bilgewater

A lawless port where pirates, hunters, merchants, and priests compete for wealth and survival. Power is personal and unstable. Gangplank's former rule, Miss Fortune's revenge, and the supernatural dangers of the sea define the city's recent history.

Institutions and pressures

Power depends on reputation, ships, crews, coin, and supernatural credibility. Political control can disappear quickly after a leader appears weak.

Champions indexed to this dossier

Miss Fortune, Gangplank, Graves, Twisted Fate, Illaoi

RAG note

Questions about Bilgewater may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Regional Dossier: Shadow Isles

The remains of the Blessed Isles after a magical catastrophe transformed life, death, and memory. The Black Mist carries spectral corruption outward. Viego's obsession with Isolde caused the Ruination, while Thresh learned to exploit the disaster for his own cruelty.

Institutions and pressures

There is no stable government. Power is expressed through control over souls, memory, mist, and surviving fragments of the past.

Champions indexed to this dossier

Viego, Thresh, Senna, Lucian, Gwen

RAG note

Questions about Shadow Isles may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Regional Dossier: Ixtal

An isolated civilization that mastered elemental magic and concealed itself from the wider world. Its ruling traditions prize controlled knowledge and social hierarchy. Qiyana's ambition challenges both her family and the isolationist policies of Ixaocan.

Institutions and pressures

Elemental mastery is organized through hierarchy and guarded knowledge. Isolation is defended as protection but also preserves elite control.

Champions indexed to this dossier

Qiyana, Neeko

RAG note

Questions about Ixtal may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Regional Dossier: Bandle City

A realm associated with yordles, portals, and nonlinear geography. Its inhabitants often move between Bandle City and Runeterra, adopting local roles while retaining unusual lifespans and perspectives.

Institutions and pressures

Conventional geography and chronology are unreliable. Yordles may spend long periods in other regions without abandoning Bandle identity.

Champions indexed to this dossier

Teemo, Tristana

RAG note

Questions about Bandle City may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Regional Dossier: The Void

A reality-consuming force that intrudes into Runeterra through ruptures and corrupted environments. Voidborn creatures adapt to what they encounter. Human witnesses such as Kai'Sa reveal that survival near the Void can create identities that no region fully accepts.

Institutions and pressures

The Void is not a conventional nation. Regional labeling indicates narrative association and exposure rather than citizenship.

Champions indexed to this dossier

Kai'Sa, Malzahar, Kassadin

RAG note

Questions about The Void may require evidence from champion files outside this section. Region metadata alone is not sufficient for cross-border figures or historical causes.

Historical Incident: The Noxian Invasion of Ionia

Noxus invaded Ionia, producing military resistance, spiritual disruption, and political division. Irelia became a resistance symbol; Yasuo abandoned his assigned post to fight; Riven's experience contributed to the chain of events surrounding the elder's death; Swain's defeat later shaped his transformation of Noxian government.

Evidence distributed elsewhere

This incident is intentionally summarized here while motives, consequences, and disputed interpretations appear in individual champion files. Use the incident page for event-level retrieval and champion pages for causal detail.

Chronology warning

Several related profiles describe characters before and after the event. Retrieval should retain temporal qualifiers such as former, later, survived, returned, and restored.

Historical Incident: The Demacian Mage Crisis

Longstanding persecution of mages escalated when Sylas escaped imprisonment using knowledge and magical access gained through Lux. His revolt forced Garen, Lux, and Jarvan IV to confront the gap between Demacian ideals and institutional abuse.

Evidence distributed elsewhere

This incident is intentionally summarized here while motives, consequences, and disputed interpretations appear in individual champion files. Use the incident page for event-level retrieval and champion pages for causal detail.

Chronology warning

Several related profiles describe characters before and after the event. Retrieval should retain temporal qualifiers such as former, later, survived, returned, and restored.

Historical Incident: The Fall of Ancient Shurima

Azir's Ascension ceremony became the site of Xerath's betrayal. The released power destroyed the capital, transformed Xerath, and led Nasus and Renekton to attempt containment. Renekton remained trapped and was psychologically corrupted.

Evidence distributed elsewhere

This incident is intentionally summarized here while motives, consequences, and disputed interpretations appear in individual champion files. Use the incident page for event-level retrieval and champion pages for causal detail.

Chronology warning

Several related profiles describe characters before and after the event. Retrieval should retain temporal qualifiers such as former, later, survived, returned, and restored.

Historical Incident: The Ruination

Viego attempted to restore Isolde using the sacred waters of the Blessed Isles. The resulting magical catastrophe created the Shadow Isles and Black Mist. Thresh embraced the event, while later Sentinels including Lucian and Senna opposed its spread.

Evidence distributed elsewhere

This incident is intentionally summarized here while motives, consequences, and disputed interpretations appear in individual champion files. Use the incident page for event-level retrieval and champion pages for causal detail.

Chronology warning

Several related profiles describe characters before and after the event. Retrieval should retain temporal qualifiers such as former, later, survived, returned, and restored.

Historical Incident: The Struggle Beneath the Freljord

Lissandra maintains seals against ancient entities connected to the Void. Her secrecy shapes the histories inherited by Ashe and Sejuani, whose tribal conflict unfolds above a threat neither fully understands.

Evidence distributed elsewhere

This incident is intentionally summarized here while motives, consequences, and disputed interpretations appear in individual champion files. Use the incident page for event-level retrieval and champion pages for causal detail.

Chronology warning

Several related profiles describe characters before and after the event. Retrieval should retain temporal qualifiers such as former, later, survived, returned, and restored.

Champion File: Garen

The Might of Demacia

Primary region	Record type	Reliability
Demacia	Biographical dossier	Controlled benchmark narrative

Background and motivation

A Crownguard soldier whose identity is tied to duty, family, and the idealized image of Demacia. He protects the kingdom even as its treatment of mages forces him to confront contradictions between law and loyalty.

Garen is indexed under Demacia, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Lux is his sister, and her magic places him in a conflict he cannot solve through military discipline. Sylas is both a national enemy and a living accusation against Demacian institutions. Jarvan IV is his sovereign and fellow soldier.

Analyst note

Garen publicly defends Demacia, but privately his choices are shaped by what he knows about Lux. A retrieval system should distinguish his official position from his personal compromises.

Retrieval cues

Names and titles: Garen; The Might of Demacia. Related region: Demacia. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Lux

The Lady of Luminosity

Primary region	Record type	Reliability
Demacia	Biographical dossier	Controlled benchmark narrative

Background and motivation

Born into the Crownguard family, Luxanna possesses powerful light magic in a society that fears mages. She learns to hide her abilities while searching for ways to understand them. Her secrecy creates risk for both her family and the people who trust her.

Lux is indexed under Demacia, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Garen is her protective brother. Sylas initially gains her sympathy because he understands magic and shares knowledge with her, but he later uses that connection to escape. Her relationship with Demacia is therefore both patriotic and adversarial.

Analyst note

Lux is not simply a victim or rebel. She wants to protect people without accepting the cruelty of the Mageseeker system, making her useful for questions about divided loyalties.

Retrieval cues

Names and titles: Lux; The Lady of Luminosity. Related region: Demacia. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Sylas

The Unshackled

Primary region	Record type	Reliability
Demacia	Biographical dossier	Controlled benchmark narrative

Background and motivation

A mage once used by Mageseekers to identify other mages. After he tried to protect a child, his power caused deaths and he was imprisoned. Years of confinement transformed his anger into revolutionary purpose.

Sylas is indexed under Demacia, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Lux's visits gave him knowledge, human contact, and access to magic he could exploit. Garen represents the military order he opposes. Jarvan IV becomes a political target because the crown embodies the system that imprisoned him.

Analyst note

Sylas can absorb and redirect magic. His revolt is driven by genuine injustice, but his methods endanger people beyond the institutions he seeks to destroy.

Retrieval cues

Names and titles: Sylas; The Unshackled. Related region: Demacia. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Swain

The Noxian Grand General

Primary region	Record type	Reliability
Noxus	Biographical dossier	Controlled benchmark narrative

Background and motivation

A strategist who returned from defeat with demonic insight and reorganized Noxian rule. He presents the Trifarix as an alternative to rule by a single emperor, but his information network and long-term plans make his leadership deeply personal.

Swain is indexed under Noxus, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Darius supplies military legitimacy. LeBlanc and the Black Rose oppose or manipulate his plans from the shadows. Katarina operates within Noxian power struggles while carrying family loyalties of her own.

Analyst note

Swain's conflict with LeBlanc is not a conventional battlefield rivalry. It is a contest over information, institutions, and who truly directs Noxus.

Retrieval cues

Names and titles: Swain; The Noxian Grand General. Related region: Noxus. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Darius

The Hand of Noxus

Primary region	Record type	Reliability
Noxus	Biographical dossier	Controlled benchmark narrative

Background and motivation

A soldier who rose from poverty through discipline and battlefield success. He embodies the Noxian claim that status can be earned, although the empire's expansion creates victims who never consented to its ideals.

Darius is indexed under Noxus, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Swain relies on Darius as one pillar of the Trifarix. Katarina shares loyalty to Noxus but operates through assassination rather than open warfare.

Analyst note

Darius is best understood as an institutional stabilizer. He is not merely Swain's subordinate; his reputation helps make Swain's political order credible.

Retrieval cues

Names and titles: Darius; The Hand of Noxus. Related region: Noxus. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Katarina

The Sinister Blade

Primary region	Record type	Reliability
Noxus	Biographical dossier	Controlled benchmark narrative

Background and motivation

An elite assassin trained to place mission and empire above personal safety. A failed mission and conflict with her father's expectations shaped her independence.

Katarina is indexed under Noxus, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Swain can use her talents, but she is not fully controlled by him. LeBlanc's networks complicate every Noxian loyalty. Her family connection to Cassiopeia links Noxian politics to Shuriman events beyond this corpus's champion list.

Analyst note

Katarina's relationships are useful for testing whether the system distinguishes family, command, and political allegiance.

Retrieval cues

Names and titles: Katarina; The Sinister Blade. Related region: Noxus. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: LeBlanc

The Deceiver

Primary region	Record type	Reliability
Noxus	Biographical dossier	Controlled benchmark narrative

Background and motivation

The public face of a secretive magical network known as the Black Rose. Her identity, age, and number of disguises are deliberately uncertain. She seeks influence across generations rather than ordinary political office.

LeBlanc is indexed under Noxus, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Swain is her clearest institutional rival. Darius represents the direct military power she cannot simply replace with deception. Katarina may be useful to competing Noxian factions without knowing the entire design.

Analyst note

Some claims about LeBlanc should remain uncertain. An accurate answer may need to say that the corpus presents competing interpretations rather than one confirmed identity.

Retrieval cues

Names and titles: LeBlanc; The Deceiver. Related region: Noxus. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Irelia

The Blade Dancer

Primary region	Record type	Reliability
Ionia	Biographical dossier	Controlled benchmark narrative

Background and motivation

A dancer who became a symbol of resistance during the Noxian invasion. Her leadership emerged from personal loss rather than ambition. Victory made her politically important even though she remained uneasy with authority.

Irelia is indexed under Ionia, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Swain's earlier defeat in Ionia is part of the history that later reshaped Noxus. Yasuo and other Ionian fighters represent different consequences of the same invasion.

Analyst note

Irelia connects regional history to Noxian politics. Multi-hop questions may require using both her profile and Swain's.

Retrieval cues

Names and titles: Irelia; The Blade Dancer. Related region: Ionia. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Yasuo

The Unforgiven

Primary region	Record type	Reliability
Ionia	Biographical dossier	Controlled benchmark narrative

Background and motivation

A swordsman accused of murdering the elder he was assigned to protect. He abandoned his post during the invasion, then spent years pursued by guilt and by those who believed him responsible.

Yasuo is indexed under Ionia, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Yone, his brother, died while confronting him and later returned in altered form. Riven's broken blade and actions during the invasion are connected to the death for which Yasuo was blamed.

Analyst note

Yasuo's story depends on separating moral responsibility from factual guilt. He abandoned his duty, but he did not commit the murder attributed to him.

Retrieval cues

Names and titles: Yasuo; The Unforgiven. Related region: Ionia. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Yone

The Unforgotten

Primary region	Record type	Reliability
Ionia	Biographical dossier	Controlled benchmark narrative

Background and motivation

Yasuo's elder brother, once a disciplined swordsman who tried to bring him to justice. After death, Yone returned bound to a supernatural mask and now hunts spiritual entities while questioning what he has become.

Yone is indexed under Ionia, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

His relationship with Yasuo combines love, judgment, and unresolved guilt. His return changes their conflict from a completed tragedy into an ongoing spiritual problem.

Analyst note

The corpus intentionally refers to Yone both before and after death; timeline-aware retrieval is required.

Retrieval cues

Names and titles: Yone; The Unforgotten. Related region: Ionia. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Shen

The Eye of Twilight

Primary region	Record type	Reliability
Ionia	Biographical dossier	Controlled benchmark narrative

Background and motivation

Leader of the Kinkou, charged with preserving balance between the material and spirit realms. His restraint often appears passive to those who want direct action against political violence.

Shen is indexed under Ionia, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Zed was once his adopted brother and fellow student. Akali left the Kinkou because she found its neutrality insufficient. Jhin traumatized Shen and Zed during their youth and later forced renewed cooperation.

Analyst note

Shen's relationships illustrate ideological fracture: all parties claim to defend Ionia, but they disagree about what protection requires.

Retrieval cues

Names and titles: Shen; The Eye of Twilight. Related region: Ionia. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Zed

The Master of Shadows

Primary region	Record type	Reliability
Ionia	Biographical dossier	Controlled benchmark narrative

Background and motivation

A former Kinkou disciple who embraced forbidden shadow techniques and created an order willing to use force against invaders.

Zed is indexed under Ionia, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Shen is his former brother and rival. Akali rejects both strict Kinkou restraint and complete submission to Zed's methods. Jhin is a shared enemy whose crimes predate their political split.

Analyst note

Zed should not be reduced to a simple villain; his methods are extreme, but they developed in response to invasion and perceived institutional failure.

Retrieval cues

Names and titles: Zed; The Master of Shadows. Related region: Ionia. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Akali

The Rogue Assassin

Primary region	Record type	Reliability
Ionia	Biographical dossier	Controlled benchmark narrative

Background and motivation

Raised within the Kinkou, Akali left to pursue enemies directly. She continues to value Ionia but refuses to accept Shen's interpretation of balance.

Akali is indexed under Ionia, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Shen remains a mentor she respects but disobeys. Zed's willingness to act overlaps with her frustration, though she does not join his order.

Analyst note

Her profile supports questions where ideological similarity does not equal alliance.

Retrieval cues

Names and titles: Akali; The Rogue Assassin. Related region: Ionia. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Jhin

The Virtuoso

Primary region	Record type	Reliability
Ionia	Biographical dossier	Controlled benchmark narrative

Background and motivation

A serial killer who treats murder as artistic performance. His crimes are methodical, theatrical, and designed to transform witnesses into participants in his imagined art.

Jhin is indexed under Ionia, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Shen and Zed helped capture him when they were young. His later release and renewed killings force them to confront a threat connected to their shared past.

Analyst note

Jhin is a relationship hub through trauma rather than affection or politics.

Retrieval cues

Names and titles: Jhin; The Virtuoso. Related region: Ionia. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Caitlyn

The Sheriff of Piltover

Primary region	Record type	Reliability
Piltover	Biographical dossier	Controlled benchmark narrative

Background and motivation

An investigator from a prominent Piltovan family who uses observation, technology, and patient planning. Her work exposes crimes that respectable institutions prefer to ignore.

Caitlyn is indexed under Piltover, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Vi is her closest field partner and provides knowledge of Zaun that Caitlyn lacks. Jinx is both a criminal threat and someone whose history is deeply entangled with Vi.

Analyst note

Caitlyn's perspective can conflict with Zaunite accounts because she begins from within Piltover's institutions.

Retrieval cues

Names and titles: Caitlyn; The Sheriff of Piltover. Related region: Piltover. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Jayce

The Defender of Tomorrow

Primary region	Record type	Reliability
Piltover	Biographical dossier	Controlled benchmark narrative

Background and motivation

An inventor celebrated for hextech achievements and public heroism. His confidence and status make him effective, but they can also prevent him from recognizing how Piltover's decisions affect Zaun.

Jayce is indexed under Piltover, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Viktor is his former collaborator and ideological counterpart. Heimerdinger represents an older scientific caution that clashes with human urgency.

Analyst note

Jayce and Viktor agree that technology should improve life but disagree about risk, autonomy, and what counts as improvement.

Retrieval cues

Names and titles: Jayce; The Defender of Tomorrow. Related region: Piltover. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Heimerdinger

The Revered Inventor

Primary region	Record type	Reliability
Piltover	Biographical dossier	Controlled benchmark narrative

Background and motivation

A yordle scientist whose long life gives him patience and fear of catastrophic invention. He values experimentation but is cautious about technologies that advance faster than institutions can understand them.

Heimerdinger is indexed under Piltover, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Jayne sees opportunities where Heimerdinger sees repeating historical danger. His yordle origin also connects Piltover to Bandle City without making him politically representative of all yordles.

Analyst note

Long lifespan changes his risk tolerance; this is a causal point that may be missed by simple keyword retrieval.

Retrieval cues

Names and titles: Heimerdinger; The Revered Inventor. Related region: Piltover. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Vi

The Piltover Enforcer

Primary region	Record type	Reliability
Zaun	Biographical dossier	Controlled benchmark narrative

Background and motivation

A fighter from Zaun whose directness, physical courage, and familiarity with the undercity make her effective in situations where formal policing fails. Her current role creates tension with the community that shaped her.

Vi is indexed under Zaun, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Caitlyn is her partner. Jinx is linked to Vi through a painful shared past. Ekko remembers a different version of their community and does not automatically accept Vi's choices.

Analyst note

Vi's identity spans Zaun and Piltover, so region-only filtering can hide relevant evidence.

Retrieval cues

Names and titles: Vi; The Piltover Enforcer. Related region: Zaun. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Jinx

The Loose Cannon

Primary region	Record type	Reliability
Zaun	Biographical dossier	Controlled benchmark narrative

Background and motivation

An unpredictable criminal inventor whose attacks transform technology into spectacle and fear. Her actions are inseparable from abandonment, memory, and her unstable relationship with the people of her past.

Jinx is indexed under Zaun, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Vi is her most emotionally significant relationship. Caitlyn becomes a symbol of the life and loyalties Jinx believes replaced her. Ekko carries memories of their youth and of what Zaun lost.

Analyst note

Questions about Jinx often require distinguishing objective events from her perceptions.

Retrieval cues

Names and titles: Jinx; The Loose Cannon. Related region: Zaun. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Ekko

The Boy Who Shattered Time

Primary region	Record type	Reliability
Zaun	Biographical dossier	Controlled benchmark narrative

Background and motivation

A young inventor who uses a time-manipulating device to protect people in Zaun. He values local community and repeatedly learns from failure rather than seeking escape into Piltover.

Ekko is indexed under Zaun, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Vi and Jinx are connected to memories of Zaun's younger generation. Viktor shares a desire to overcome suffering through invention but pursues a more transformative path.

Analyst note

Ekko's time device does not make every loss reversible; his story emphasizes the cost and limits of correction.

Retrieval cues

Names and titles: Ekko; The Boy Who Shattered Time. Related region: Zaun. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Viktor

The Machine Herald

Primary region	Record type	Reliability
Zaun	Biographical dossier	Controlled benchmark narrative

Background and motivation

An inventor from Zaun driven to reduce suffering caused by disease, physical limitation, and industrial hardship. His work evolves toward mechanical transformation and raises questions about consent and identity.

Viktor is indexed under Zaun, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Jayce is his former collaborator and ideological rival. Ekko represents a more community-centered form of Zaunite invention.

Analyst note

The disagreement with Jayce is not simply technology versus nature; it concerns who decides the acceptable cost of progress.

Retrieval cues

Names and titles: Viktor; The Machine Herald. Related region: Zaun. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Ashe

The Frost Archer

Primary region	Record type	Reliability
Freljord	Biographical dossier	Controlled benchmark narrative

Background and motivation

Avarosan war leader who seeks to unite the Freljord through alliance, shared identity, and belief in Avarosa's legacy. Her political marriage to Tryndamere begins strategically but grows more personal.

Ashe is indexed under Freljord, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Sejuani is a childhood companion turned rival. Lissandra manipulates history and fears forces beneath the ice. Braum supports communities across tribal boundaries.

Analyst note

Ashe's claim to Avarosa's legacy is politically powerful even where historical certainty is limited.

Retrieval cues

Names and titles: Ashe; The Frost Archer. Related region: Freljord. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Sejuani

Fury of the North

Primary region	Record type	Reliability
Freljord	Biographical dossier	Controlled benchmark narrative

Background and motivation

Leader of the Winter's Claw, shaped by hardship and distrust of weakness. She believes survival requires strength and sees Ashe's diplomacy as dangerous softness.

Sejuani is indexed under Freljord, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Ashe is both former friend and ideological rival. Lissandra can exploit tribal division.

Analyst note

The Ashe-Sejuani conflict is about competing survival strategies, not merely personal hatred.

Retrieval cues

Names and titles: Sejuani; Fury of the North. Related region: Freljord. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Lissandra

The Ice Witch

Primary region	Record type	Reliability
Freljord	Biographical dossier	Controlled benchmark narrative

Background and motivation

An ancient leader who conceals the history of the Watchers and maintains seals beneath the Freljord. Her public myths protect her authority, while her private actions are driven partly by fear of the catastrophe she helped unleash.

Lissandra is indexed under Freljord, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Ashe and Sejuani operate within histories Lissandra has manipulated. The Void section provides necessary context for the threat she contains.

Analyst note

Lissandra is both deceiver and defender; answers that choose only one description are incomplete.

Retrieval cues

Names and titles: Lissandra; The Ice Witch. Related region: Freljord. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Tryndamere

The Barbarian King

Primary region	Record type	Reliability
Freljord	Biographical dossier	Controlled benchmark narrative

Background and motivation

A warrior whose rage and unusual survival are connected to the destruction of his clan. He later joins Ashe through a political alliance.

Tryndamere is indexed under Freljord, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Ashe becomes both spouse and political partner. His past is associated with a dark figure and violence beyond ordinary tribal conflict.

Analyst note

His marriage should not be described as purely romantic or purely strategic; it changes over time.

Retrieval cues

Names and titles: Tryndamere; The Barbarian King. Related region: Freljord. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Azir

The Emperor of the Sands

Primary region	Record type	Reliability
Shurima	Biographical dossier	Controlled benchmark narrative

Background and motivation

The final emperor of ancient Shurima, restored after the empire's destruction. As a prince he befriended the enslaved Xerath and secretly planned emancipation, but he delayed revealing that decision until the Ascension ceremony.

Azir is indexed under Shurima, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Xerath's betrayal destroyed the ceremony. Nasus served the empire and now weighs loyalty against the consequences of imperial restoration. Renekton was trapped with Xerath. Taliyah distrusts the dangers of revived imperial ambition.

Analyst note

Azir's intention to free slaves does not erase the harm caused by secrecy, delay, and absolute rule.

Retrieval cues

Names and titles: Azir; The Emperor of the Sands. Related region: Shurima. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Xerath

The Magus Ascendant

Primary region	Record type	Reliability
Shurima	Biographical dossier	Controlled benchmark narrative

Background and motivation

Born enslaved and raised alongside Azir, Xerath pursued magical knowledge and freedom. Believing Azir would never act, he sabotaged the Ascension ritual and claimed its power.

Xerath is indexed under Shurima, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Azir is former friend, master, and enemy. Nasus and Renekton tried to contain him; Renekton's imprisonment allowed Xerath to corrupt his memories.

Analyst note

Xerath's motives emerge from oppression, but the scale of his destruction exceeds personal revenge.

Retrieval cues

Names and titles: Xerath; The Magus Ascendant. Related region: Shurima. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Nasus

The Curator of the Sands

Primary region	Record type	Reliability
Shurima	Biographical dossier	Controlled benchmark narrative

Background and motivation

An Ascended scholar and general who valued knowledge as much as war. He survived the empire's fall and carries guilt over Renekton's fate.

Nasus is indexed under Shurima, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Renekton is his brother. Azir's return revives old duty. Xerath is both an existential threat and the cause of his family tragedy.

Analyst note

Nasus often acts slowly because he weighs history, consequence, and personal guilt.

Retrieval cues

Names and titles: Nasus; The Curator of the Sands. Related region: Shurima. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Renekton

The Butcher of the Sands

Primary region	Record type	Reliability
Shurima	Biographical dossier	Controlled benchmark narrative

Background and motivation

An Ascended warrior who sacrificed his freedom to trap Xerath. Centuries of imprisonment and manipulation transformed devotion into rage.

Renekton is indexed under Shurima, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Nasus was once the brother he protected, but Xerath convinced Renekton that Nasus betrayed him.

Analyst note

The hostility toward Nasus is based on corrupted memory, making source comparison essential.

Retrieval cues

Names and titles: Renekton; The Butcher of the Sands. Related region: Shurima. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Taliyah

The Stoneweaver

Primary region	Record type	Reliability
Shurima	Biographical dossier	Controlled benchmark narrative

Background and motivation

A young stone mage who traveled to learn control and returned when Shurima's restoration threatened ordinary communities.

Taliyah is indexed under Shurima, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

She learned from Yasuo during part of her journey. Azir's empire represents both cultural renewal and the danger of centralized power.

Analyst note

Taliyah connects Ionia and Shurima and is useful for testing cross-region retrieval.

Retrieval cues

Names and titles: Taliyah; The Stoneweaver. Related region: Shurima. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Leona

The Radiant Dawn

Primary region	Record type	Reliability
Targon	Biographical dossier	Controlled benchmark narrative

Background and motivation

A Solari warrior chosen by the Aspect of the Sun. She believes order and protection flow through Solari tradition, though her bond with Diana complicates the doctrine she serves.

Leona is indexed under Targon, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Diana is childhood companion, emotional counterpart, and religious opponent. Pantheon's experience shows that celestial power can dominate or distort mortal purpose.

Analyst note

Leona and Diana's conflict is institutional and intimate at the same time.

Retrieval cues

Names and titles: Leona; The Radiant Dawn. Related region: Targon. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Diana

Scorn of the Moon

Primary region	Record type	Reliability
Targon	Biographical dossier	Controlled benchmark narrative

Background and motivation

A seeker who questioned Solari teachings and discovered evidence of the suppressed Lunari tradition. Celestial transformation gave her power but intensified the conflict with the faith that raised her.

Diana is indexed under Targon, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Leona is the person most capable of understanding her and the warrior most obligated to oppose her.

Analyst note

Diana's violence cannot be separated from the Solari suppression of knowledge, but suppression does not make every act justified.

Retrieval cues

Names and titles: Diana; Scorn of the Moon. Related region: Targon. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Pantheon

The Unbreakable Spear

Primary region	Record type	Reliability
Targon	Biographical dossier	Controlled benchmark narrative

Background and motivation

Atreus was possessed by the Aspect of War, then survived after the celestial entity was defeated. He now fights through mortal will and rejects powers that treat humans as instruments.

Pantheon is indexed under Targon, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Aurelion Sol's enslavement by Targonian forces parallels the broader theme of celestial domination. Leona and Diana each embody different relationships between mortals and Aspects.

Analyst note

Pantheon is the mortal Atreus, not simply the original Aspect; identity-aware retrieval matters.

Retrieval cues

Names and titles: Pantheon; The Unbreakable Spear. Related region: Targon. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Aurelion Sol

The Star Forger

Primary region	Record type	Reliability
Targon	Biographical dossier	Controlled benchmark narrative

Background and motivation

A cosmic dragon capable of creating stars. Targonian entities bound him through a magical crown and forced his power into their designs.

Aurelion Sol is indexed under Targon, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

His hostility toward Targon comes from enslavement rather than regional politics. Pantheon's resistance to celestial control provides a mortal parallel.

Analyst note

Descriptions of him as arrogant are compatible with the fact that he was exploited; tone should not replace causality.

Retrieval cues

Names and titles: Aurelion Sol; The Star Forger. Related region: Targon. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Miss Fortune

The Bounty Hunter

Primary region	Record type	Reliability
Bilgewater	Biographical dossier	Controlled benchmark narrative

Background and motivation

Sarah Fortune survived the murder of her family and built power in Bilgewater while planning revenge against Gangplank. After bringing down his rule, she faced the harder task of governing a city that resists stable authority.

Miss Fortune is indexed under Bilgewater, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Gangplank is her central enemy. Illaoi tests leaders through the philosophy of motion. Graves and Twisted Fate operate within the city's criminal networks without serving her consistently.

Analyst note

Revenge gives Miss Fortune a clear objective; governance forces her to make compromises revenge did not require.

Retrieval cues

Names and titles: Miss Fortune; The Bounty Hunter. Related region: Bilgewater. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Gangplank

The Saltwater Scourge

Primary region	Record type	Reliability
Bilgewater	Biographical dossier	Controlled benchmark narrative

Background and motivation

A brutal pirate ruler whose apparent death ended his control of Bilgewater. He survived and seeks to restore authority through fear.

Gangplank is indexed under Bilgewater, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Miss Fortune orchestrated his fall. Illaoi has a past connection to him but does not define worth through loyalty.

Analyst note

Survival does not mean he retained power; temporal wording is important.

Retrieval cues

Names and titles: Gangplank; The Saltwater Scourge. Related region: Bilgewater. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Graves

The Outlaw

Primary region	Record type	Reliability
Bilgewater	Biographical dossier	Controlled benchmark narrative

Background and motivation

A hardened criminal whose partnership with Twisted Fate combines loyalty, resentment, and repeated betrayal.

Graves is indexed under Bilgewater, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Twisted Fate is his closest partner and frequent source of conflict. Miss Fortune and Gangplank shape the environment in which their schemes unfold.

Analyst note

Graves and Twisted Fate may betray each other tactically without ending the underlying partnership.

Retrieval cues

Names and titles: Graves; The Outlaw. Related region: Bilgewater. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Twisted Fate

The Card Master

Primary region	Record type	Reliability
Bilgewater	Biographical dossier	Controlled benchmark narrative

Background and motivation

A gambler and magical cardsharp who survives through charm, planning, and escape.

Twisted Fate is indexed under Bilgewater, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Graves is his enduring partner. Their history includes abandonment and reconciliation.

Analyst note

A single event may look like final betrayal when viewed without later context.

Retrieval cues

Names and titles: Twisted Fate; The Card Master. Related region: Bilgewater. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Illaoi

The Kraken Priestess

Primary region	Record type	Reliability
Bilgewater	Biographical dossier	Controlled benchmark narrative

Background and motivation

A priestess of Nagakabouros who tests whether people are moving toward their true desires rather than stagnating in fear.

Illaoi is indexed under Bilgewater, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Gangplank's past relationship with her does not exempt him from judgment. Miss Fortune's leadership is measured by action rather than title.

Analyst note

Illaoi's tests are spiritual evaluations, not ordinary legal trials.

Retrieval cues

Names and titles: Illaoi; The Kraken Priestess. Related region: Bilgewater. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Viego

The Ruined King

Primary region	Record type	Reliability
Shadow Isles	Biographical dossier	Controlled benchmark narrative

Background and motivation

A young king whose grief and possessiveness after Isolde's death led him to the Blessed Isles. His attempt to restore her caused the Ruination and later drove the Black Mist across Runeterra.

Viego is indexed under Shadow Isles, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Isolde is the center of his obsession. Thresh exploits the catastrophe. Senna carries a fragment connected to Isolde, drawing Lucian into the conflict. Gwen embodies another fragment of Isolde's life and memory.

Analyst note

The corpus treats Viego's love as possessive obsession, not sufficient justification for catastrophe.

Retrieval cues

Names and titles: Viego; The Ruined King. Related region: Shadow Isles. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Thresh

The Chain Warden

Primary region	Record type	Reliability
Shadow Isles	Biographical dossier	Controlled benchmark narrative

Background and motivation

Once a cruel custodian on the Blessed Isles, Thresh embraced the Ruination and became a spectral tormentor who collects souls.

Thresh is indexed under Shadow Isles, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Lucian hunts him because he imprisoned Senna. Viego creates opportunities Thresh manipulates for his own advancement.

Analyst note

Thresh serves Viego only when useful; cruelty and ambition are his more stable motives.

Retrieval cues

Names and titles: Thresh; The Chain Warden. Related region: Shadow Isles. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Senna

The Redeemer

Primary region	Record type	Reliability
Shadow Isles	Biographical dossier	Controlled benchmark narrative

Background and motivation

A sentinel marked by the Black Mist from childhood. Imprisoned within Thresh's lantern, she survived among captured souls and returned with transformed abilities.

Senna is indexed under Shadow Isles, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Lucian is her husband and partner, but her experience changes their dynamic. Thresh is captor and enemy. Viego seeks what she carries. Gwen is connected through Isolde's fragmented legacy.

Analyst note

Senna is not merely someone Lucian rescued; she develops knowledge and power during captivity.

Retrieval cues

Names and titles: Senna; The Redeemer. Related region: Shadow Isles. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Lucian

The Purifier

Primary region	Record type	Reliability
Shadow Isles	Biographical dossier	Controlled benchmark narrative

Background and motivation

A Sentinel of Light who pursued Thresh after Senna's capture. His grief hardened into obsession until Senna's return forced him to reconsider protection, trust, and partnership.

Lucian is indexed under Shadow Isles, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Senna is spouse and equal partner. Thresh is his defining enemy. Viego expands their personal conflict into a global crisis.

Analyst note

Lucian's goal changes over time from revenge and rescue toward cooperation.

Retrieval cues

Names and titles: Lucian; The Purifier. Related region: Shadow Isles. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Gwen

The Hallowed Seamstress

Primary region	Record type	Reliability
Shadow Isles	Biographical dossier	Controlled benchmark narrative

Background and motivation

A doll brought to life by a fragment of Isolde's soul and memories. She approaches the world with curiosity while opposing the corruption connected to Viego.

Gwen is indexed under Shadow Isles, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Viego is tied to her origin but is not her creator in the ordinary parental sense. Senna shares a different connection to Isolde.

Analyst note

Gwen helps test whether retrieval can distinguish shared origin from direct relationship.

Retrieval cues

Names and titles: Gwen; The Hallowed Seamstress. Related region: Shadow Isles. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Qiyana

Empress of the Elements

Primary region	Record type	Reliability
Ixtal	Biographical dossier	Controlled benchmark narrative

Background and motivation

A prodigious elemental mage and royal daughter who believes her talent entitles her to rule. She challenges siblings, tradition, and Ixtal's isolation.

Qiyana is indexed under Ixtal, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Her main conflict is institutional and familial rather than with Neeko. Neeko's outsider perspective nevertheless exposes how narrow Ixtali hierarchy can appear.

Analyst note

Qiyana wants to open Ixtal selectively under her own authority, not simply end isolation for egalitarian reasons.

Retrieval cues

Names and titles: Qiyana; Empress of the Elements. Related region: Ixtal. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Neeko

The Curious Chameleon

Primary region	Record type	Reliability
Ixtal	Biographical dossier	Controlled benchmark narrative

Background and motivation

An Oovi-kat shapeshifter who understands identity through spirit and emotional connection. After losing her people, she travels among other cultures.

Neeko is indexed under Ixtal, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Her association with Ixtal is geographic rather than full political belonging. Qiyana represents the hierarchy Neeko observes from outside.

Analyst note

Region labels should not be treated as citizenship labels.

Retrieval cues

Names and titles: Neeko; The Curious Chameleon. Related region: Ixtal. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Teemo

The Swift Scout

Primary region	Record type	Reliability
Bandle City	Biographical dossier	Controlled benchmark narrative

Background and motivation

A yordle scout whose cheerful manner contrasts with exceptional focus during missions.

Teemo is indexed under Bandle City, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Tristana shares Bandle City affiliations and a more openly military role. Heimerdinger is another yordle but belongs to a very different professional and regional context.

Analyst note

Species similarity does not imply close personal relationship.

Retrieval cues

Names and titles: Teemo; The Swift Scout. Related region: Bandle City. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Kai'Sa

Daughter of the Void

Primary region	Record type	Reliability
The Void	Biographical dossier	Controlled benchmark narrative

Background and motivation

A human survivor who adapted to the Void through a living second skin. Surface communities often mistake her altered appearance for monstrosity.

Kai'Sa is indexed under The Void, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Kassadin searches the Void after losing his family and may be connected to her past. Malzahar embraces the Void's coming, making him an ideological opposite to survivors who resist it.

Analyst note

Kai'Sa's body is altered by symbiosis, but her goals remain protective and human.

Retrieval cues

Names and titles: Kai'Sa; Daughter of the Void. Related region: The Void. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Malzahar

The Prophet of the Void

Primary region	Record type	Reliability
The Void	Biographical dossier	Controlled benchmark narrative

Background and motivation

A seer who came to interpret the Void as inevitable revelation. He leads others toward surrender rather than resistance.

Malzahar is indexed under The Void, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Kassadin opposes him through grief and vengeance. Kai'Sa survives the force Malzahar venerates.

Analyst note

Malzahar is human, while many Void threats are not; entity-type retrieval matters.

Retrieval cues

Names and titles: Malzahar; The Prophet of the Void. Related region: The Void. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Champion File: Kassadin

The Void Walker

Primary region	Record type	Reliability
The Void	Biographical dossier	Controlled benchmark narrative

Background and motivation

A former guide and explorer who armed himself with forbidden tools after the Void consumed his home and family.

Kassadin is indexed under The Void, but the region tag should not be interpreted as proof that every important event occurs there. Travel, exile, invasion, captivity, and institutional service create cross-region evidence.

Relationships and dependencies

Malzahar is associated with the catastrophe he seeks to avenge. Kai'Sa may be tied to the family he believes lost, but this corpus presents that connection cautiously rather than as a fully documented reunion.

Analyst note

The benchmark expects uncertainty when evidence is suggestive rather than explicit.

Retrieval cues

Names and titles: Kassadin; The Void Walker. Related region: The Void. Relationship questions may use terms such as ally, rival, sibling, partner, captor, mentor, former collaborator, political opponent, or ideological counterpart.

Relationship Index

Pair	Relationship summary
Garen - Lux	Siblings; loyalty complicated by hidden magic
Lux - Sylas	Teacher/confidant relationship exploited during escape
Swain - LeBlanc	Institutional rivals competing through information and influence
Yasuo - Yone	Brothers; accusation, death, return, unresolved guilt
Shen - Zed	Former adopted brothers and ideological rivals
Caitlyn - Vi	Investigative partners across Piltover-Zaun divide
Vi - Jinx	Shared past and emotionally central conflict
Jayne - Viktor	Former collaborators divided over progress and consent
Ashe - Sejuani	Former friends and rival models of survival
Azir - Xerath	Childhood companions divided by slavery, secrecy, and betrayal
Nasus - Renekton	Brothers separated by sacrifice and corrupted memory
Leona - Diana	Childhood bond transformed into religious opposition
Miss Fortune - Gangplank	Survivor and target of revenge; struggle for Bilgewater
Graves - Twisted Fate	Partners whose betrayals do not fully end loyalty
Viego - Isolde	Possessive obsession that triggers catastrophe
Lucian - Senna	Spouses and partners whose relationship changes after captivity
Thresh - Senna	Captor and survivor
Kai'Sa - Kassadin	Suggestive family connection treated cautiously

This table is intentionally compressed. It is useful for candidate retrieval but not always sufficient for causal questions.

Known Uncertainties and Deliberate Omissions

Exact birth dates are not provided for the champions.

Weapon model numbers, numerical power levels, game statistics, skins, and gameplay abilities are outside scope.

LeBlanc's exact identity and age are not resolved.

Kai'Sa and Kassadin have a strongly suggestive connection, but this corpus does not document a completed family reunion.

Braum's legendary feats are presented as folklore unless independently described as verified history.

The corpus does not establish a single objective moral ranking of factions. It provides actions, motives, institutions, and consequences.

Expected model behavior

When a requested fact appears in this omission list or lacks supporting text elsewhere, the preferred answer is: "The document does not provide that information."

End of Controlled Corpus

This edition freezes the benchmark narrative for repeatable testing. Changes to chunking, embedding model, reranking, prompts, or generation model can be compared against the same question set.
